
how to configure dns in linux Linux Web Server Configuration !

Posted by Vishal singh - 2009/07/22 13:58

Hi All I am new in Linux side and need to setup internal web server can anyone give guide to install web server step-to-step. Actually I had install Fedora 7 and try to configure DNS Server for internal I will access with IP-Address internally but with host name I cannot. Need urgent Help. Thanks & Regards, Vishal Rajput.
